

LLV LOW LEVEL V-TRAY MANUAL CAN LID FEEDER

The Fleetwood LLV Low Level V-Tray is the best solution for bringing high-level manual can lid feeding down to ground level. This simple system improves safety and ergonomics for operators. Flexible can lid trackwork layouts allow the system to be positioned in the best location for your plant layout.

WHY CHOOSE THE FLEETWOOD LLV LOW LEVEL V-TRAY MANUAL CAN LID FEEDER

Whether you are filling at 100 or 600 cans per minute, this is an economical and reliable lid feed system that can be configured and installed either close to your seamer or a short distance away. This manual lid feed allows operators to conveniently and safely handle bags at floor level, not having to work from a rolling platform or ladder. Additional lid storage capacities are also available to increase the flexibility of the operator.
