

HEMA CANFL INLINE VOLUMETRIC FILLER

The Hema CANFL is an inline volumetric filler machine designed for pasty and thick products. With a speed range of 1,800 to 24,000 containers per hour, the CANFL offers a filling volume from 100 to 2,000 ml with 1 or 2 filling heads. It is compatible with metal, glass or plastic cans. Hema CANFL can be paired with the Hema CS vacuum seamer for shaped or round cans.

WHY CHOOSE THE HEMA CANFL?

Applications / Industries:

Ideal for:

- ✓ Corned Beef
- ✓ Lunch Meat
- ✓ Meat & Fish Pate
- ✓ Pet Food

Features

Engineered for Performance

- Speed up to 400 cans per minute
- Different formats : round, rectangular or trapezoidal, with or without slope
- Running different materials: metal, glass or plastic
- Simplified mechanical design for vertical startup

High Accuracy Dosing & Product Integrity

- Filling cornet with ball and circular cutting knife for hard pate or pieces
- Rotary knife for a perfect product cutting in case of meat with nerves as an alternative (round cans only)
- The "no can-no fill" concept limits losses and guarantees machine cleanliness
- The design of our filling valve guarantees optimal filling accuracy

Unmatched Robustness & Accessibility

- The entire mechanical part of the machine in the oil tank requires no lubrication (guaranteeing long equipment life)
- Safety guard with sliding doors (single head version) for easy access and cleaning, in compliance with EC standards
- A walkway gives access to the product feeding hopper for maintenance or cleaning
- Conveyor transfer: lifting platform in case of bottom filling system

Product Flexibility

- Easy to use filler that requires minimal adjustments to set up
- Adjustment to the height of the frame and the filling volume is motorized.
- Production is managed from a tactile operating panel and different parameters are pre-programmed, depending on the recipes being filled.

MORE THAN MACHINES. A PARTNERSHIP FOR LIFE.

At BW Packaging, we don't just build machines — we're your lifetime partner in production success. Our global service network, parts availability, training and upgrades all work together to keep your machines running for years to come.
