

HEMA CANSM CAN SEAMER AND CLINCHER

The Hema CANSM is a can seamer and clincher machine designed for shaped and round cans. Along with a standardized machine design, it is compatible with round metal cans of various shapes: oval, square, rectangular, trapezoidal, and pear-shaped. According to your product, this seamer is available in two configurations: Vacuum or atmospheric. With a speed range of 4,800 to 9,000 cups per hour, the CANSM delivers reliable performance.

WHY CHOOSE THE HEMA CANSM?

Applications / Industries:

Ideal for:

✓ Corned Beef ✓ Lunch Meat ✓ Meat Pate ✓ Canned Fish

Features

Reliable Performance

- Speed up to 150 cans per minute
- High speed clinching with vertical movement chuck
- Different formats : round, rectangular or trapezoidal, with or without slope
- Adaptable to various specifications :
 - Diameter : 45 to 155 mm
 - Diagonal : 45 to 170 mm
 - Height : 20 to 250 mm

Standardized Machine Design

- Vacuum seaming to maintain preservation and optimal appearance of the product
- Seaming profile quality ensured by cam and counter cam
- "No can-no lid" to limit losses
- Lid distributor equipped with a scroll separator operating from dispenser. Allows the lid to be lowered gradually and synchronously with the can, even if the product protrudes from the can with a dome, as the lid is guided to its position on the can.

Robust and Easy to Operate

- Continuous motion conveyor and placing of clinched cans into a transfer starwheel
- Seaming head mounted on an articulated arm giving full accessibility
- Compression pad driven by a double track cam
- Robust mechanical parts running in oil bath for longer durability

Optional Turnkey Line Configuration

- Our expertise in filling and seaming can be extended to create complete lines combining filling up to 24,000 cans per hour
- Hema volumetric filler, linear or rotary technology
- Hema vacuum seamer for shaped or round cans or Angelus atmospheric seamer for round cans at high speed
- Other functionalities able to be integrated to your can line: depalletixer, magnetic lowerator, check weigher, magnetic washer, basket unloader and loder labeler

MORE THAN MACHINES. A PARTNERSHIP FOR LIFE.

At BW Packaging, we don't just build machines — we're your lifetime partner in production success. Our global service network, parts availability, training and upgrades all work together to keep your machines running for years to come.
